LETTER OF COMMENDATION

Miami, August 9th, 2012

By the present, I wish to recommend with the highest praise the services of M. Danny Mazur, his company and his team; Chris, Hariz and other members, for their impeccable performance as **computer software and hardware service engineers**, deserving the broader counties of Miami and Dade-Broward counties, under the name of **Computer IT Solutions**.

From the start, one gets attended by a friendly receptionist, who efficiently directs you to the boss: Daniel Mazur, a.k.a Danny. Danny quickly and efficiently evaluates your problem and its state of emergency by getting a senior computer scientist to call you back, usually Chris, a gentle and friendly Polish descendant with a phlegmatic British overall stance of "can do". Without wasting any time, Chris swiftly and efficiently moves through the maze of computer jargon to quickly eliminate the bugs and fix the problem.

Surprise, for a first visit I'd be happy to pay hundred bucks for such speedy recovery. Chris joyously announces to me that I am the beneficiary of a promotional introductory deal of thirty bucks, trip inclusive, for the 2-1/2 hours he spent fixing my computer. Sympathizing, we talk and he asks me if I'd like for him to have a look at the Babbage's remnant of my kids' computer until Saturday. Of course I would. And on Saturday on my doorstep, whom do I see? My man Chris with my antiquity repaired!

PC? (*no problem!*). Mac? (*no problem*)...

I thus ask him to reformat my computer (*no problem!*), making sure no software is lost (*no problem!*), and that everything is spic n' span... and problem free (*no problem!*). One week later; I get a phone call from Dan "*hey Claude, your computer's ready!*"... Clutching my piggy-bank, I go there, wondering how much of my retirement pension I am going to spend, when a announce 200 bucks... And you know what!? They'll be praised on my next book but... *Shhhhhh*!!!

Try them if you don't believe me!

They are on computer what Chantilly is on Crème brulee !!!
