

*With 20 workstations in two locations, and a server we can't work without, our company's computer needs can be complicated and time sensitive. Luckily for us, we've had CompITs to help. Dan and his team are flexible, savvy, intuitive, and are always willing to work with us. Their expertise rescued us during the worst emergency possible, a hard disc crash. When other IT companies would have charged a lot more for the same services, CompITs was budget conscious and still are. Dan and CompITs have kept our computers and our server running smoothly for three years – I wouldn't trust anyone else.*

*Dan, I wanted to take a moment to reflect on your recent efforts and service in getting my computer system back up and running. Having owned my on construction, development and consulting company for over thirty-five years and always recognizing the need to have the required tools to compete, I understand the importance of having "talented support" available when needed. Having access to qualified people and managing costs are all part of that which contributes to a "positive bottom line". There are times when the size, volume and / or fabric of a company do not justify a full-time IT staff person. Looking back over the past five years in which you have served as the "IT Support Person" for my company, I cannot recall an instance where you were not available (24/7) and quickly and efficiently responded and resolved the particular problem at hand. Your deployment of web based "remote access service" has allowed me to feel secure in that I can be at my office in Hollywood or on the road and never be without support. Your competitive rates and equitable billings have always allowed me to feel comfortable in picking up the phone and asking for help. Your patience and willingness to train, so as to allow me a better opportunity at "self help", has encouraged me to attempt to resolve those minor challenges that arise from time to time.*

*Thank you for your continued service and support,  
Tom Brinkley

*Over the past 9 years CompITS has been our IT support team here in Miami. Our needs continue to change, and as they have Dan's provided the infrastructure and technology assuring our ability to meet or exceed our goals. From working long ago with stand alone computers to the Servers, VPN, RDP, BES, remote and other types of services we use today, Dan's seeing to it we're always up and running, and that if a problem occurs, he's easily reached and quick to respond with diligence until everything's working again. For any company it's important to be surrounded by qualified people, but more than that we consider Dan and his staff a part of our family. With computers, Internet access and technology being such necessary and important aspects in today's business world, it's important to know we have a trustworthy company-people who care watching out for our needs.*

*As a consulting service I rely almost exclusively on my laptop to communicate with my Clients and Work Associates. Therefore, having proficient and timely support for my Outlook, Blackberry and the entire variety of technical software supporting my business needs is a Number 1 priority for me. Also, since I was as start-up company as of 3 years ago, cost for this service was also a high priority in my decision making for this service. Given that my business requires to me to work during "off" hours, including Saturday and/or Sundays, I was also looking for someone who could resolve my IT issues, or answer my naïve questions, at 11:00 p.m. or 6:00 a.m. I selected COMPITS as my IT support (for both hardware and software needs) because of my past experience with Dan Mazur while employed by a local company. I have not been disappointed. I have ALWAYS found Dan to be available and expedient with the applying the appropriate technical knowledge and skills to resolve the issue . . . no matter how obscure the issue. My experience with Dan over the last 5 years has allowed me to witness how he has dealt with the challenges in his own business and has given me a sense of admiration from observing how he has always extended himself to best serve his Clients' every changing needs and demands.*

*Comptis Inc., Dan Mazur has provided IT services for me and my family for over seven years now. I am highly satisfied with all the services provided by his company. Dan has been most helpful with his service and advice regarding our home wireless system, and it's been especially advantageous that Dan has a broad range of knowledge in his specialized field.*

*Hani El-Naffy  
CEO Del Monte Foods

*Around two years ago we contacted Comptis to work in a IT project. Dan and his team worked around the clock to accomplish that mission. Along the way, he make the necessary recommendation to put our IT infrastructure up to date. As a Microsoft Outlook is a core component of our operation, Comptis installed, configured and managed two servers with Microsoft Server 2003 and Exchange Server, wired the entire headquarter with Cat 6 cables, installed Routers, Bridges, Switches, Firewalls and set up the network to be able to work with an IP telephone system. In addition they took the control of our overseas office is South America.*

*Every time that something happen with our system, Dan and his team are a call away to support and solve any situation, even remotely. So we didn't experience any downtime since Comptis started to work with us.*

*We have a peace of mind knowing that we count with the backup and experience of Comptis, at the end the product of the work they has provided us, by far, exceeded our highest expectations.*

*For all of these reasons we would recommend Comptis as your IT solution company.*
